PROJECT DEMONSTRATION

Workflow Walkthrough, Validation & Submission Evidence

Medical Diagnosis Center in ServiceNow

Project Overview

This demonstration presents the Medical Diagnosis Center workflow in ServiceNow from patient registration through appointment booking, approval, laboratory processing, report availability, notification, refund, security and dashboard reporting.

Demonstration Flow

Step	Project Demonstration	Evidence to Show
1	Open ServiceNow Service Portal	Home Page
2	Open Test Catalog	Diagnostic test details
3	Register/select patient	Patient information
4	Book appointment	Test, date, time and validation
5	Show validation	Mandatory/duplicate/overlap/capacity controls
6	Approve appointment	Approval status + notification
7	Process appointment	Sample Collected → Processing → Completed
8	Generate report	Report linked to appointment/patient
9	Open Lab Reports	Authorized report access
10	Cancel appointment	Cancelled + 10% refund calculation
11	Show ACL/security	Role-based/patient-specific access
12	Show dashboard	Health Reports Dashboard + Appointments Reports
13	Show deployment	ServiceNow Update Set

Project Walkthrough Script

Start from the Service Portal home page. Demonstrate the Test Catalog and patient appointment booking. Show validation for mandatory data and conflicting slots. Approve the appointment, process it through sample collection and laboratory processing, complete it, generate/link the report and demonstrate report availability. Finish with cancellation/refund, ACL security and the management dashboard.

Final Validation Checklist

- Patient registration works.
- Test catalog displays configured tests.
- Appointment booking and validation work.
- Approval/status workflow works.
- Report is generated/linked correctly.
- Notifications trigger as configured.
- Cancellation/refund logic works.
- ACL security works.

• Dashboard/report displays appointment data.

• Update Set is ready for deployment.

Submission / Evidence Checklist

Item	Status
Ideation Phase	Included
Requirement Analysis	Included
Project Planning Phase	Included
Project Design Phase	Included
Project Development Phase	Included
Project Documentation	Included
Project Demonstration	Included
ServiceNow Update Set XML	Included
Original README	Included
Screen Recording	Included
Team ID	Not provided

Project Outcome

The Medical Diagnosis Center provides a centralized ServiceNow workflow for patient registration, diagnostic test selection, appointment management, laboratory processing, report delivery, notifications, security and operational reporting.
